EDUCATION

SaiGon University

B.S Software Engineering

Sept. 2023 – June 2027

Current GPA: 3.1/4.0

SKILLS

Languages: C/C++, Python (Data Structures, Algorithms), Java (OOP), JavaScript/TypeScript

Frameworks: Node.js, Next.js (SSR/SSG, App Router), Spring Boot (JPA/Hibernate, MapStruct), React, Tailwind CSS , Express.js, ShadCN

Tools & Technologies: Git/GitHub (CI/CD), Unix Shell (Bash/WSL2), Docker (Containerization), PostgreSQL, MySQL, MongoDB, RESTful APIs, RAG Systems (LLMs, Vector DB), Cloudinary

PROJECTS

AI-Powered Document Q&A (RAG) | *Django, React 19, LangChain,Ollama, FAISS*

Jan. 2026

- Developed a localized RAG system using Ollama (Qwen2.5:7B) to ensure data privacy for PDF, Docx, Images.
- Built a retrieval pipeline with LangChain, FAISS, and nomic-embed-text for high-accuracy document querying.
- Integrated Tesseract OCR and PyPDF to automate text extraction from scanned documents and images.
- Developed full-stack features using Django REST Framework, React 19, and Tailwind CSS.

Source Code: github.com/NguyenAn-1703/PTPM_MNM

E-Commerce Platform | *Java, Spring Boot, ReactJS, MySQL, Docker*

Sep. 2025

- Built ChatBOT model for product consultation, 24/7 customer support, improving user experience.
- Implemented JWT authentication, Google OAuth2 login, and role-based access control (RBAC).
- Deployed online payment system integrated with VNPay payment gateway.
- Developed core features: login, homepage, search, product display for customers, promotion management, inventory management, sales reporting, and employee management.

Source Code: github.com/congquan92/SZ

ChatWeb | *TypeScript, ReactJS, Node.js, Socket.io, MongoDB*

Mar 2025

- Built a real-time chat application with a user-friendly interface and fast message sending/receiving capabilities.
- Used WebSocket with Socket.IO to ensure continuous connection and efficient data transmission between client and server.
- Integrated MongoDB to store chat history and manage users.
- User authentication using JWT, and message encryption using AES-RSA to ensure data security.

Source Code: github.com/congquan92/ChatWeb

SGU Timetable | *React, TypeScript, Tailwind CSS, Firebase*

Jan. 2023

- Developed a smart timetable planner for SGU students, reaching over **50,000+** total visits.
- Implemented a conflict-detection algorithm for smart booking, automatically preventing schedule overlaps.
- Built an calendar grid with LocalStorage synchronization, enabling users to manage up to 5 schedule versions.
- Integrated Firebase Firestore with a cooldown mechanism to track system traffic.

AWARDS & CERTIFICATIONS

Academic Excellence Scholarship | *Saigon University*

2024 – 2025

- Awarded twice for maintaining a high GPA and demonstrating outstanding academic performance in Software Engineering.

English Proficiency - CEFR B1

2025

- Capable of reading technical documentation and communicating effectively in professional environments.
